Human Informed Consent Form

Instructions to the Student Researcher(s): An informed consent/assent/permission form should be developed in consultation with the Adult Sponsor, Designated Supervisor or Qualified Scientist.
This form is used to provide information to the research participant (or parent/guardian) and to document written informed consent, minor assent, and/or parental permission.

- When written documentation is required, the researcher keeps the original, signed form.
- Students may use this sample form or may copy ALL elements of it into a new document.

If the form is serving to document parental permission, a copy of any survey or questionnaire must be attached.

Student Researcher(s): Nivaan Debnath

Title of Project: FocusGuard: An Analysis of Real-Time Visual Distraction Detection Through Webcam-Based Gaze and Facial Landmark Tracking Using Heuristic and Decision Trees

I am asking for your voluntary participation in my science fair project. Please read the following information about the project. If you would like to participate, please sign in the appropriate area below.

Purpose of the project:
The purpose of this project is to test whether FocusGuard can use a regular computer webcam to detect signs of distraction, such as looking away from the screen or looking at a phone. It will also test whether alerts and automatic pauses helps focus.

If you participate, you will be asked to:

You will complete computer tasks while FocusGuard uses a webcam to track your head position and eye movements. You may be asked to look at the screen,

Time required for participation:
Participation will take about 40-45 minutes, including setup, testing, and breaks. The total time may vary slightly.

Potential Risks of Study:

Some possible risks include eye strain from using a computer, frustration from alerts or automatic pauses, and privacy concerns from using a webcam. You can take breaks or stop participating at any time.

Benefits:
There may be no direct benefit to participating. However, the results could help show whether FocusGuard can detect visual distractions and help people reduce phone use while working.

How confidentiality will be maintained:
Each participant will be given a code instead of having their name used in the research data. The data will be stored securely and only shared with the researcher and approved supervisors. Personal messages and other privacy features will not leak.

If you have any questions about this study, feel free to contact:

Adult Sponsor/QS/DS: Punam Singh Phone/email: PunamKSingh@Katyisd.org

Voluntary Participation:

Participation in this study is completely voluntary. If you decide not to participate there will not be negative consequences. Please be aware that if you decide to participate, you may stop participating at any time and you may decide not to answer any specific question.

By signing this form I am attesting that I have read and understand the information above and I freely give my consent/assent to participate or permission for my child to participate.
